**Notice of Site Work**

We wish to advise our neighbours that some preliminary site investigation work will be taking place on the Kanata Golf and Country Club lands during the month of February.

This will involve a survey team and equipment taking ground samples. Doing this during the winter is optimal, as the ground is frozen and the work will not damage or impact the golf course.

The work will be conducted in a phased manner throughout the property, and in clearly marked areas. We would appreciate residents avoiding these areas while equipment and workers are present.

Thank you for your cooperation.
