

**Date:** April 24, 2026

**To:** Councillor Curry, Marcia Wallace, Derrick Moodie

**Subject: 7000 Campeau Drive – Update**

The current work plan for the property was completed last Friday, April 17, as previously communicated. The remaining work that was originally planned has been placed on hold.

Moving forward, we do not anticipate significant site activity over the next one to two months. On-site activities will be limited to surveying, sampling, testing, and monitoring. Should more substantial work be required to complete our engineering submission, we will provide sufficient advance notice.

We will continue to conduct regular site visits to monitor stormwater flow through the property and to ensure that all measures remain effective.

This will be the final update related to this phase of work; however, we remain committed to ongoing stormwater monitoring and ensuring the continued effectiveness of all measures in place.

Sincerely,

ClubLink, Minto Group & Richcraft Homes
